

About Wabash Solutions, Inc.

An Information Technology Services Company

If you are looking for a software engineer, technical writer, or expert IT professionals to integrate an entire system, Wabash Solutions has the answer. Our services range from supplemental staffing to systems integration for turnkey Information Technology solutions.

Our offerings include:

- Supplemental Staffing
- System Integration
- ERP Services
- Multimedia Services

We Deliver these services by focusing on the following areas.

Quality Personnel

Our recruiting plans are designed to identify and retain the very best IT experts. Their personal well-being, financial well-being and professional growth is important to us. The result is committed and high quality people with a focus on delivering what we promise.

Total Service Solutions

We are committed to keeping up with the rapid changes that occur in the IT industry. We are constantly growing, improving and evolving so that we can offer our clients a broad spectrum of services.

Focus on Client Satisfaction

We measure our success based on the value you realize from the work we do. Our business is to help you get the best return on your investment in information technology...whether its providing the expertise to plan a complex project or supplying a temporary consultant to get through a difficult period.

Contact us for experienced, trained professionals who can address your business' IT requirements. We have the capability to deliver the solutions you demand.

Staffing Services

Our staffing representatives are trained to ask the relevant questions necessary to gain a thorough understanding of your requirements. We then evaluate and screen qualified candidates that will fit your needs. The result is a smooth transition from our staff to yours.

Wabash Solutions, Inc. has a proven track record in matching our clients' needs with qualified IT professionals. We offer comprehensive solutions to your staffing challenges by providing professionals with a variety of technical skills. Compatibility to the work environment is an important criteria we consider and is why many of our contract employees have gone on to be hired permanently by our clients. System Integration Services

If you are making a short or long-term commitment, you want strong predictable results. After studying your unique needs, we apply our in-depth industry knowledge to make sound recommendations, then work with you to establish a strong technical team. In this way, we establish effective partnerships with clients that achieve effective and economical results.

New technologies come with new challenges. Because of the comprehensive set of technical skills that our personnel possess, we ensure that our clients receive the "best" IT services known.

We offer a multitude of Technical Services, some of which are listed below.

Applications Development
Business Requirements Analysis
Data Communications
Documentation/Technical Writing
Workstation Support
Electronic Commerce

ERP Services

We acknowledge that "Special Attention" needs to be given to supporting Vendor Developed software packages. We serve our clients best by employing IT personnel trained in the most recent software updates. We created our Professional Services Group to meet this challenge. The group focuses on the products described below.

Peoplesoft™
SAP™
Oracle Applications™
Clarify™

Improve your appearance to the world by using our State-of-the-Art Media presentation skills. No matter if you desire to create a Computer Based Training application, an interactive Kiosk or your Annual Statement published on a CD, Wabash Solutions, Inc. can produce the material you desire. Utilizing the latest technology, we create products to your specification. Our experience in this area allows us to offer you a price that makes it easy for you to adopt the latest communications techniques. Here are some of the types of products we can develop for you.

Multimedia Services

Web-Site Design

The World Wide Web has opened markets to businesses of all sizes around the globe. Wabash Solutions can help you take advantage of this exciting new market arena. We design cutting edge interactive and "E-Commerce" web sites. From initial concept to ensuring bank deposits, we will develop your project plan, integrate design cues using your existing marketing identity and assist in marketing your new web site so you achieve the maximum exposure.

Multimedia Presentations

No matter if you are detailing your corporate market strategy or equipping your sales and consulting force with a new powerful demonstration tool, Wabash Solutions, Inc. can assist you in creating dynamic presentations incorporating animation, video, charts and digital audio. Let us help you engage your audience or "Close the Deal" by employing a dramatic Multimedia demonstration.

Interactive Annual Reports

Any size company can enhance its corporate image with an inter-active annual report. Attract and grow your investor base with an interactive prospectus. Multimedia technology lets you introduce top executives or investors to your company by using state-of-the-art video. You simplify complex concepts and strategies using graphic animation. Your ability to dramatically present facts will enhance your ability to project a sense of your corporate culture.

Placing your Annual Report on CD-ROM will convey your company's mission and philosophy, while serving as a powerful tool to investors.
